The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 2 is rejected under 35 U.S.C. 102(b) as being anticipated by Kuroda et al

(5815472).

The reference shows an optical disk recording and reproducing apparatus comprising: the steps of receiving a write command (fig 4 step S1), analyzing the received data recording command S2, storing the encoded data in a buffer element 9, and recording the buffered data on the medium based on the buffer filing level S8.

Claims 3-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

None of the cited prior art discloses the method steps as claimed.

Claims 1, and 6-10 are allowed.

None of the cited prior art shows or teaches an optical disk recording apparatus comprising a buffer 205 for storing and encoding the data blocks to be recorded on the disk, an ECC memory

element 203 for storing the data in the unit of an ECC block read from the disk and a controller operating as claimed.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. 6357030; 5970208; and 6504801.
